About Us

We leverage technology to address a diverse set of real world challenges by creating time critical solutions that solve business and social needs on mobile, hardware and cloud platforms.

Our process involves creating simple to use innovative tools that enrich the lives of people.

We are constantly inspired by the stories of people who have used the tools we created to better their lives.

We believe in creating the right tools for people to use to change their lives, and those around them.

Products

A23Pay

Cashless Finance System

The Cashless Finance System helps organizations accelerate their transition from physical cash handling to 'going cashless' with online payment collection and/or online payment processing across the mobile money platforms.

Contact Us

BioID

Biometric Time and Attendance

Reliable optimal fingerprint recognition systems that guarantee 100% identification accuracy for large organizations. This software combines hardware with support software to enroll and verify members in large interest groups.

Contact Us

UltimateSMS

Personalized and Contextual SMS System

Contextualize all SMS communication that goes out to your clients. With a unique user differentiator, send personalized messages to clients that contain client names, deposited amounts, outstanding balances, special discounts and promotions

Contact Us

EasyDial

USSD Management System

EasyDial Bridges the gap between the fast-paced online environment and the last mile offline digital interface. EasyDial uses the power of USSD (Unstructured Supplimentary Service Data) to collect data and reach users with feature phones.
